## (54) CIRCUIT FOR OPERATING DC MOTOR

(57)Abstract:

PURPOSE: To make a selection between the power and braking operation in a manner of contactlessness enabling the selection at many times of high frequency, by means of connecting specifically three pairs of parallel circuits consisting of diode and transistor between three-phase bridged rectifier and DC motor.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
